Understanding Demand

Economics: Unit 2

What is Demand?

- **The desire to OWN something and the ABILITY TO PAY for it**
 - **(willingness and ability)**

Put this word on your vocab list

Demand

□ **How does this relate to me?**

□ **Who would LIKE to buy this handbag?**

The handbag costs \$1400.

□ **Who is ABLE to buy this handbag?**

Demand

□ **How does this relate to me?**

□ **Who would LIKE to buy this car?**

The car costs \$218,310

□ **Who is ABLE to buy this car?**

Law of Demand

- **Consumers buy more of a good when its price decreases and less when its price increases**

Put this word on your vocab list

Law of Demand

- **How does it relate to me?**

Scenario:

- **Would you buy a slice of pizza for lunch for \$1?**
- **Maybe you would; some might even buy more than one**

- **Would you buy the same slice for \$2?**
- **Fewer would buy it at that price.**
- **Even real pizza lovers would reduce their consumption from 3 to 4 slices to just 1 or 2**

- **How many of us would buy a slice for \$10?**
- **Probably very few**

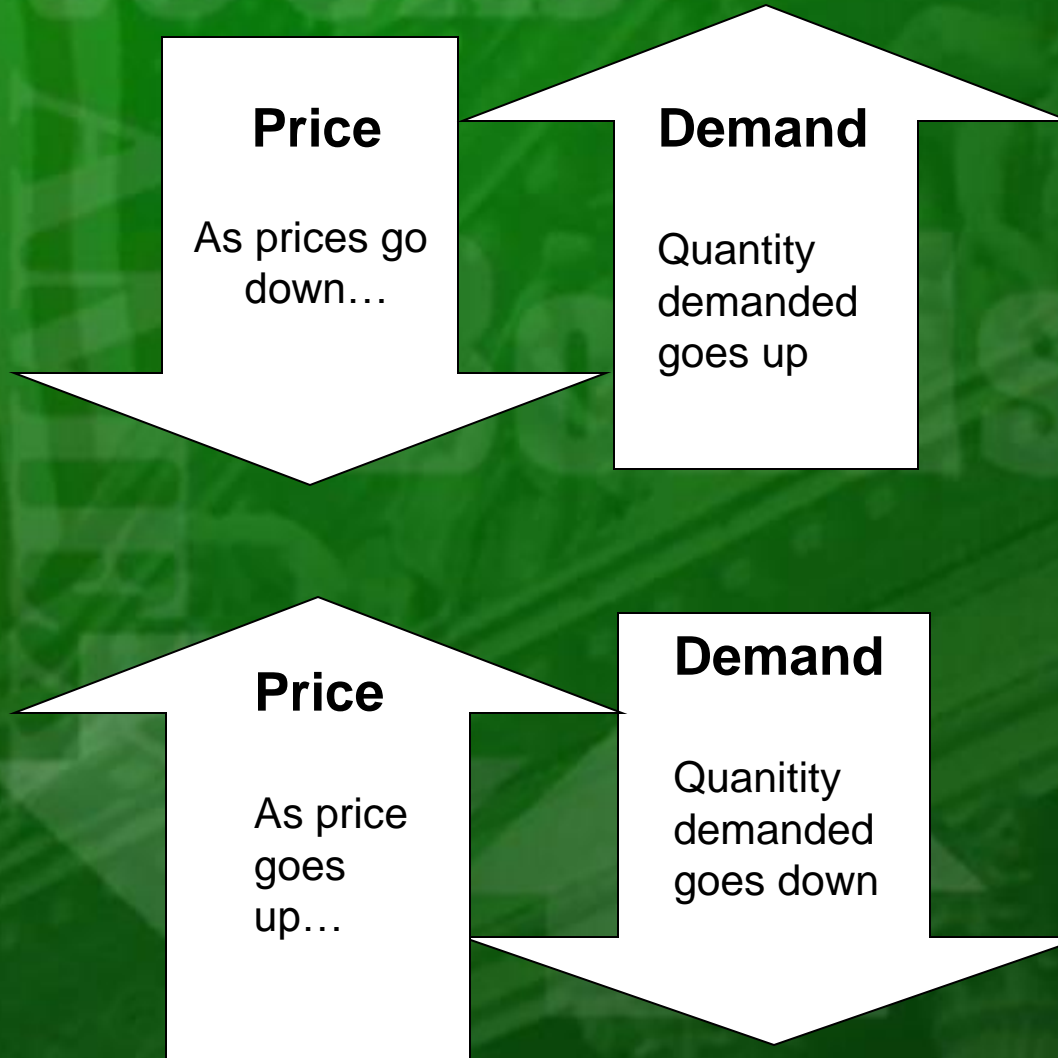

Law of Demand

- **Scenario conclusion:**
 - **As the price of pizza gets higher and higher, fewer of us are willing to buy it**

This is the Law of Demand!

Law of Demand

Law of Demand

Hershey Chocolate Activity

Create this Chart on a piece of paper

	Volunteer #1	Volunteer #2	Volunteer #3	Volunteer #4	Volunteer #5	Total
10¢						
20¢						
30¢						
40¢						
50¢						

Demand Schedule

- **We just created one!**
- **So what is it?**

On your vocab sheet, define demand schedule

**“A table that lists at various prices,
the number of items demanded”**

Demand Schedule

Price	Quantity

What's next?

- After you have a demand schedule, you need to graph it

Demand Curve

- You just created a demand curve
- What is a demand curve?

On your vocab sheet, define demand curve

“the graphic representation of demand”

Activity to do on your own

1. Get in groups of by row
2. **Create a table like the one we used to determine how many pieces of candy the volunteers were willing to purchase at each price point**
3. Pick a different item to survey each other about. Ask the same questions: “How many would you buy for 50 cents...” and so on. (demand) You can change the item completely and the price point.
4. **Once you figure out the totals for each price point (demand schedule), create the demand curve (graph it on the graph paper). Each person needs to create their own graph**
